# Challenge Accepted

The cement and concrete industries face some new challenges in the upcoming years. The Cement and Concrete Products Industry (CCPI) of Hawaii's members are ready to take on these challenges with their experience and expertise. We look to continue providing support, quality materials and supplies to the construction industry.

Worldwide changes to typical business practices will largely impact the industry in the next year. Some of them are already being felt. Supply chains continue to evolve as businesses adjust to the material supply differences and transportation adjustments. Raw material supplies that were strategically located to provide steady sources with minimal

interruption have now moved farther away with more limited means of transport. Changes in the material shipping industry also have reduced the availability of the ships that transport finished materials to our islands. The size of the Hawaiian market also impacts the available options for supply as accessibility, storage and quality of product limit choices to import materials needed here.

The challenges we face require learning about new technologies and growing in our production methods. Changes in cement technologies, which reduce the carbon footprint of cement and permanently capture carbon dioxide, are gaining acceptance and proving effective in accomplishing these goals. Some of these changes require producers to adjust concrete recipes to ensure the end-product behaves the same way that concrete has worked in the past. Some changes may require instructing users on how the concrete must be handled differently. Fortunately, some of these technologies have been used in other parts of the world and have proven to provide good alternatives to ordinary Portland cement.

The cement and concrete industry has worked hard to reduce its carbon footprint by 20% in

the past seven years. Reuse of waste materials, improvements in process efficiency and advancements in technology have pushed us forward. By continuing this effort, we strive to reach even higher goals. We also need to share and celebrate these accomplishments. We look forward to returning to hosting seminars where we can discuss the best ways to incorporate concrete into Hawaii's buildings and infrastructure.

Concrete continues to be used as a durable, sustainable material for many projects. Hawaii's marine environment, exposure to termites, weather conditions and climate make concrete a great choice for long-term construction investments. Under most circumstances, the long service life requires minimal reconstruction or maintenance.

We will continue to push forward the industry by examining the tools and advancements being developed to better the concrete industry. Thank you for your continued partnership with our members to create a better Hawaii for the years ahead.

Aloha and mahalo,

**Kirk Hashimoto**

Executive Director, Cement and Concrete Products Industry of Hawaii

# 2023 CALENDAR OF EVENTS

## JANUARY

- 3 & 5 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- 11 SEAOG Installation Banquet, Pacific Club – 5:30 PM
- 16-19 World of Concrete (Las Vegas, NV) [worldofconcrete.com](http://worldofconcrete.com)
- 23–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 25 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 20-22 Building Industry Association (BIA) -The Big Home Building & Remodeling Show [biahawaii.org](http://biahawaii.org)
- 28 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) [ccpihawaii.org](http://ccpihawaii.org)

## FEBRUARY

- 19 - 25 Engineers' Week Activities [www.hces.us](http://www.hces.us)
- 23 – 25 ICON & The Precast Show (Columbus, OH)

## MARCH

- 2 & 7 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)
- 10-13 NRMCA Annual Convention [nrmca.org](http://nrmca.org)
- 14-18 ConAgg/ConExpo (Las Vegas, NV) [conexpoconagg.com](http://conexpoconagg.com)
- 20–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 25 ACI Certification for Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) [ccpihawaii.org](http://ccpihawaii.org)

## APRIL

- 2-6 American Concrete Institute (ACI) Spring Convention (San Francisco, CA)

## MAY

- 2 & 4 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- 15–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 17 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 20 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) [ccpihawaii.org](http://ccpihawaii.org)

## JUNE

- TBD CCPI Seminar

## JULY

- 11 & 13 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- 24–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 29 ACI Certification for Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) [ccpihawaii.org](http://ccpihawaii.org)

## AUGUST

- 4 2022 ASCE Hawaii Scholarship Golf Tournament (Pearl Country Club) [ascehawaii.org](http://ascehawaii.org)

## SEPTEMBER

- 5 & 7 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)

- 6-9 SEAOG Joint Convention with the Structural Engineers Association of California – The Hyatt Regency, Maui
- 18–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 20 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 23 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) [ccpihawaii.org](http://ccpihawaii.org)

## OCTOBER

- 5-6 CCPI Annual Meeting (Oahu Location TBD) [ccpihawaii.org](http://ccpihawaii.org)
- 29–Nov. 2 ACI Fall Convention (Boston, MA) [concrete.org](http://concrete.org)

## NOVEMBER

- 7 & 9 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)
- 13–All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 18 ACI Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) [ccpihawaii.org](http://ccpihawaii.org)

## DECEMBER

HAPPY HOLIDAYS! MERRY CHRISTMAS!

## FRONT COVER

Precast Concrete Flag panels. One of the many examples of the versatility and beauty of concrete

# Made in Hawaii **for Hawaii.**

**For years we've been making building materials in Hawaii and saving our customers hundreds of thousands of dollars with competitively priced products that are not encumbered by high shipping costs.**

**We've been innovating and creating business opportunities in Hawaii for over 60 years and we've done so, in many cases, by being the first company to get the job done in Hawaii.**

- **First to build a packaged concrete manufacturing plant for producing products such as – QUIKRETE, BONDED and PRO-FINISH.**
- **First to specially blend cementitious based products such as concrete coloring, thinset mortars, colored grouts, polymer modified concrete repair materials, grouts and concrete finishes.**
- **First to blend concrete form releases and curing compounds**
- **First to locally blend specialty concrete admixtures**
- **First to introduce robotics into our manufacturing process**
- **First to use specialty shrink wrapping automation for minimizing pallet handling and shipping costs**

**This year, with our thanks and appreciation, we'd like to make sure our employees are recognized for their contribution to our decades-old success story.**

**Most of our employees are locally born and raised and they all have an ownership stake in the company and our local economy.**

**So in a sense, we're also "Made in Hawaii for Hawaii."**

**BONDED MATERIALS COMPANY**

# READY MIXED CONCRETE. READY TO SHAPE THE FUTURE.

Concrete is being used in some of the most innovative designs around the world. It's smart. It's bold. And the only thing it requires is a limitless imagination. If you haven't experienced the beauty of concrete, it might be time to take a look.

## 5 Key Elements to Beautiful, Innovative Design:

### Choice and flexibility

Buildings can be molded into any shape, size, color and finish you can think of. Concrete conforms to your design—not the other way around.

### Easy to use

Unlike other materials, concrete is made specifically for each project to meet the demanding needs of the owner, design team and contractor.

### Awe-inspiring

Experience a virtually limitless building material. Concrete can be transformed into some of the most innovative, beautiful designs you'll encounter.

### Saves the day and your budget

Concrete can be adapted for many different uses with little effort, so you can quickly change designs—without needing new materials.

### Comfort—naturally

Concrete inherently dampens sound, which contributes to a quiet, peaceful living environment—particularly important for residential buildings.
