

CEMENT AND CONCRETE
PRODUCTS INDUSTRY OF HAWAII

RESOURCE DIRECTORY 2024

NEXT 16 PAGES

www.buildwithstrength.com

Made in Hawaii for Hawaii.

For years we've been making building materials in Hawaii and saving our customers hundreds of thousands of dollars with competitively priced products that are not encumbered by high shipping costs.

We've been innovating and creating business opportunities in Hawaii for over 60 years and we've done so, in many cases, by being the first company to get the job done in Hawaii.

- First to build a packaged concrete manufacturing plant for producing products such as – QUIKRETE, BONDED and PRO-FINISH.
- First to specially blend cementitious based products such as concrete coloring, thinset mortars, colored grouts, polymer modified concrete repair materials, grouts and concrete finishes.
- First to blend concrete form releases and curing compounds
- First to locally blend specialty concrete admixtures
- First to introduce robotics into our manufacturing process
- First to use specialty shrink wrapping automation for minimizing pallet handling and shipping costs

This year, with our thanks and appreciation, we'd like to make sure our employees are recognized for their contribution to our decades-old success story. Most of our employees are locally born and raised and they all have an ownership stake in the company and our local economy.

So in a sense, we're also "Made in Hawaii for Hawaii."

BONDED MATERIALS COMPANY

A Test of Resilience

The cement and concrete industries face some new challenges in the upcoming years. The Cement and Concrete Products Industry (CCPI) of Hawaii's members are ready to take on these challenges with their experience and expertise. We look to continue providing support and quality materials and supplies to the construction industry.

World-wide changes to typical business practices will largely impact the industry in the next year. Some of them are already being felt. Supply chains continue to evolve as businesses adjust to the material supply differences and transportation adjustments. Raw material supplies that were strategically located to provide steady sources with minimal interruption have now moved farther away with more limited means of transport. Changes in the material shipping industry also have reduced the availability of the ships that transport finished materials to our islands. The size of the Hawaiian market also impacts the available options for supply as accessibility, storage, and quality of product limit choices to import materials needed here.

The challenges we face require learning about new technologies and growing in our production

methods. Changes in cement technologies that reduce the carbon footprint of cement and permanently capture carbon dioxide and gaining acceptance and proving effective in accomplishing these goals. Some of these changes require producers to adjust concrete recipes to ensure the end product behaves the same way that concrete has worked in the past. Some changes may require instructing users on how the concrete must be handled differently. Fortunately, some of these technologies have been used in other parts of the world and have proven to provide good alternatives to ordinary Portland cement.

The cement and concrete industry worked hard to reduce our carbon footprint by 20 percent in the past 7 years. Reuse of waste materials, improvements in process efficiency and advancements in technology have pushed us forward. By continuing this effort, we strive to reach even higher goals. We also need to share and celebrate these accomplishments. We look forward to returning to hosting seminars where we can discuss the best ways to incorporate concrete into Hawaii's buildings and infrastructure.

Concrete continues to be used as a durable, sustainable material for many projects. Hawaii's marine environment, exposure to termites, weather conditions and climate make concrete a great choice for long term construction investments. It usually requires minimal maintenance or reconstruction over the long service life under most circumstances.

We will continue to push the industry forward by examining the tools and advancements being developed to better the concrete industry. We continue to offer resources and expertise related to the cement and concrete industry. Thank you for your continued partnership with our members to create a better Hawaii for the years ahead.

Aloha and mahalo,

Kirk Hashimoto

Executive Director, Cement and Concrete Products Industry of Hawaii

2024 CALENDAR OF EVENTS

JANUARY

- 2 & 4 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- TBA SEAOH Installation Banquet
- 22-25 World of Concrete (Las Vegas, NV) worldofconcrete.com
- 22-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 24 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 19-20 Building Industry Association (BIA) -The Big Home Building & Remodeling Show biahawaii.org
- 27 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) ccpihawaii.org

FEBRUARY

- 8 - 10 The Precast Show (Denver, CO)
- 18 - 24 Engineers' Week Activities hces.us

MARCH

- 5 & 7 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)
- 11-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 16 ACI Certification for Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) ccpihawaii.org
- 18-21 NRMCA Annual Convention (Tampa, FL) nrmca.org
- 24 American Concrete Institute (ACI) Spring Convention (New Orleans, LA)

MAY

- 7 & 9 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- 13-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 15 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 18 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) ccpihawaii.org

JUNE

- TBD CCPI Seminar

JULY

- 9 & 11 ACI Concrete Field Testing Technician Grade I Review Sessions (via Zoom)
- 22-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 27 ACI Certification for Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) ccpihawaii.org

AUGUST

- 2 (PENDING) 2024 ASCE Hawaii Scholarship Golf Tournament (Location TBA) ascehawaii.org

SEPTEMBER

- 10 & 14 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)
- TBA SEAOH Convention
- 18-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants

- 25 ACI Concrete Strength Technician Review Session (HC&D Sand Island)
- 28 ACI Certification for Concrete Field Testing Technician Grade I and Concrete Strength Testing Exams (HC&D, Sand Island) www.ccpihawaii.org

OCTOBER

- 10-11 CCPI Annual Meeting (Hawaii Island, TBD) ccpihawaii.org

NOVEMBER

- 3 - 6 ACI Fall Convention (Philadelphia, PA)
- 5 & 7 ACI Concrete Field Testing Technician Grade I Review Session (via Zoom)
- 18-All Week Practice for ACI Concrete Field Testing Technician Gr. 1 at Producer Plants
- 23 ACI Concrete Field Testing Technician Grade I Exam (Hawaiian Cement, Halawa) ccpihawaii.org
